## NURSERYMEN AND FRUIT GROWERS SAY:

# Allen L. Wood's Plants are the Best in the World

## \*\*\* WHY? \*\*\*

**First.**—They are grown on the best soil in the United States which makes an extra fine plant.

**Second.**—He grows all of his own plants. They are extra strong and well rooted.

**Third.**—He propagates his stock from the most vigorous and healthy growth he can find.

**Fourth.**—He warrants all stock true to name and of grade as represented, and free from all diseases.

**Fifth.**—He can sell you a better grade of stock than any other nurseryman, and it does not cost you any more.

**Sixth.**—He fills a small order just as carefully as car load lot. All orders are filled with freshly dug stock at time of shipment.

**Seventh.**—A Certificate of Inspection from C. A. Weiting, Commissioner of Agriculture, will be attached to all shipments.

## I GROW MY OWN PLANTS.

My business consists of growing my own plants. They are grown on the choicest land in Western New York. One lot of 40 acres I recently bought paying \$500.00 per acre for it. This lot is considered the best in New York State for growing small fruit plants. Besides the large number of acres I own, I rent several large lots of the very choicest land, paying on an average \$25.00 per acre rent per year.

My aim is to grow the very best of all the leading kinds of Small Fruit Plants. Fruit Growers can not fail to realize that success depends upon buying extra fine plants, that are grown on soil specially adapted for Small Fruit Plants.

Why not buy the best? They do not cost you any more.

## TERMS AND PARTICULARS.

Five at Ten Rates. 50 at 100 Rates. 500 at 1,000 Rates.

**My Stock of Small Fruit Plants is Largest in the World.** My facilities and conveniences for storing, packing and shipping are not equalled by any other firm. My responsibility ceases on delivery of goods at Railroad or Express Office.

**My Plants are Warranted True to Name,** and of grades represented. Should any stock not prove true to name, I will either refund the purchase money of same or replace the stock true to name free; but am not liable for further damages; and while I am exercising great care to prevent mixtures, the above is to be a condition on which all stock is delivered. All packing will be done neatly and with strict regard to the interest of the customer. Purchasers will please give shipping directions always. In case no such directions are sent with orders, I will use my best judgment in the matter.

**Terms Cash.**—Bankable notes for 30 to 60 days will be accepted from customers of satisfactory record or bank reference. Fall accounts are due before December 1st, when I draw at sight for any amount due. Interest charged on all bills over due. All express or freight charges on goods or money must be paid by the customer. If goods are shipped C. O. D., usually one-fourth the amount of bill must be sent with order.

## THE RATHBUN BLACKBERRY.

THE LARGEST OF ALL BLACKBERRIES.

Plants Hardy, Vigorous and a Great Bearer. Fruit Very Large, Black and Lustrous and of the Highest Quality.

Market growers will fully appreciate the advantage a large berry has over a small one; the gain for him is two-fold—it costs less to pick the fruit, and from its superior appearance it brings more in market.

**L. H. BAILEY, Professor of Horticulture.**

ITHACA, N. Y., JULY 21, 1896.

The Rathbun Blackberry is now in full fruit and we are very much pleased with it. It is midway between a blackberry and a dewberry in habit as also in earliness. The berries are exceedingly large, glossy, jet black, and of good quality. I certainly think that there is a future for it.

L. H. BAILEY.

## CURRANTS.

Now is the time to plant Currants and Gooseberries. They will pay you better than any other crop. The canning factories all over the country did not get one-half the fruit they wanted and paid from  $\frac{1}{3}$  to  $\frac{1}{2}$  more for Currants than they have for the past five years. They have paid twice as much for Gooseberries. I sold my Pearl fruit for twice as much as the have brought for the past three years.

### SUPERIOR QUALITY AND UNIFORM GRADE, GUARANTEED THE BEST IN THE WORLD.

**Largest grower of Currants and Gooseberries** of any Nurseryman in the world. They are **extra fine plants**. They are grown on **soil** that is **specially adapted** for **Currants and Gooseberries**.

There is not over one-fifth as many Currant and Gooseberry plants in the country as there has been for the past three years. Order early so you will not get left.

Remember two-years No. 2 grade, is as good as most nurserymen's No. 1. My one-year No. 1 and No. 2 are extra fine. Write for special price on 10,000 or more.

## PEARL GOOSEBERRY

Surpasses all other Gooseberries in Quality, Productiveness, Hardiness and Freedom of Mildew.

### What an Old English Gardener Says:

Smith Falls, Ont., July 25, 1896.  
The *Pearl* is my favorite. It is a *splendid kind, hard to beat*, taking it all through. Some of the bushes that had only been planted one year, I picked three quarts from this season. It has not shown any signs of mildew, and such a robust growth I never saw in the Old country. Some of the new wood is over two feet long and nearly half an inch thick. The White Smith and Downing mildewed badly this season.

THOMAS HAGUE.

F. CRANFIELD, Assistant Horticulturist of the Wisconsin Experiment Station, writes:

In reply to your inquiry regarding the *Pearl Gooseberry*, will say that *all other varieties, except the Pearl, in our plantation are affected with mildew*. Three plants out of six survived the severe drought of last summer, and are now growing vigorously.

The *Rural New Yorker*, says:—The *Pearl* is as *productive as anything* we have on trial. The berries are larger than the Downing and of excellent quality. Neither the *foliage nor berries* have shown the *slightest trace of mildew*.

### Read what Horticulturists say about The Pearl:

S. E. EVANS, California Horticulturist recommends the Pearl:

Our State Authorities have recommended the Pearl Gooseberry the best all-around Gooseberry.

M. J. WRAGG, Iowa State Experiment Station: I write to tell you that the 24 plants of Pearl Gooseberries that you sent me two years ago last spring to be planted in our Experimental Grounds, bore this year, 41 quarts of fruit from 20 plants as 4 of them had died. I have come to the conclusion that it is far superior to the Downing

T. T. LYON of the Michigan Agricultural Experiment Station, South Haven, Michigan, says:

*Dear Sir:*—I have been testing the Pearl Gooseberry here for several years; in my forthcoming report now ready for the press I grade it for vigor and productiveness ten, and for quality nine, upon a scale one to ten.

S. T. MAYNARD of the Massachusetts Experiment Station, Amherst, Mass., Says:

*My Dear Sir:*—The Pearl Gooseberry was planted on our grounds last spring, and consequently has borne no fruit. It has made a good growth, however, and is free from mildew.

W. J. GREEN, Horticulturist of the Ohio, Experiment Station, Wooster, Ohio, writes:

The Pearl Gooseberry has fruited here and we are well pleased with it. The plants are quite healthy. The variety is rather more prolific than the Downing, and the berries a little larger. Probably it will outrank the Downing in good qualities and seems to be well worth general trial.

H. P. GOULD of the Maine Agricultural Experiment Station, says:

*Dear Sir:*—Pearl Gooseberry, which we received from you last spring are looking fairly well. In comparison with four other varieties at the same time, they have made the largest growth and are looking the most vigorous of any of the varieties at the present time, on account of the very dry weather which we have had

GEORGE C. BUTZ of the Pennsylvania Experiment Station, says:

The Pearl you sent me this spring are making an excellent growth for the first season. Several strong shoots from near the base indicate that the Plants are well established.

I have four pages of Testimonials of the Pearl Gooseberry which will be sent free to any one who writes for it.

# POMONA CURRANT.

All Former Records Broken.

No Competitor.

Beyond comparison in productiveness and fine quality with any of the older sorts, and from present indications destined to supersede all other Red Currants. Its yield of fruit is something wonderful. From  $6\frac{1}{2}$  acres of Pomona Currants has been sold at wholesale, in three consecutive years, fruit amounting to \$9000.00, or an average of over \$461.00 yearly per acre. What Currant is there that will make as good a showing as this? The Pomona is a vigorous

and robust grower, healthy, hardy and an early bearer; foliage abundant and remains on the bush much later than other sorts. The fruit is very beautiful in appearance, of a clear, bright translucent red, bunches large and full, but in size of berry smaller than Fay though larger than Victoria and very much larger than Red Dutch. It is of remarkable fine quality, sweet and mild, and less acid than any we know of, with very few seeds and these are small. The fruit is so bright-colored and handsome that it always attracts buyers at market and it not

only hangs on the bush a long time after ripe but will also keep in good condition a long time after being picked. It bears regularly year after year with the same unfailing abundance and its immense yield, attractive appearance and fine quality make it the most profitable and desirable of all Currants.

## A FEW OF MANY REPORTS ON POMONA.

LOCKPORT, N. Y., June 26, 1897.

We have the Pomona Currant growing by the side of Prince Albert of the same age. A prominent Rochester, N. Y., and also an Iowa nurseryman, have both been here this week and both agree there is double the fruit on the Pomona that there is on the Prince Albert, and it is larger. It is surely out-yielding the Fay, which I had not thought possible. In fact, there is no kind on the place to match it in yield, and only the Cherry and Fay beat it in size. It must be in demand when it becomes known.

Yours, E. B. LEWIS.

WAUKEE, IOWA, June 23, 1897.

Gentlemen:—

Out of over twenty sorts that we have fruited now, the Pomona is the most abundant bearer and has the largest fruit and best color of any Currant on the place.

Yours truly, J. WRAGG & SONS CO.

CARLINVILLE, ILL., July 19, 1897.

The box of Pomona Fruit received, and am very much pleased with it. Large, sweet, small seeds, long stems, good foliage, and hangs as thick upon the branches as is possible. Of the 500 plants bought of you the past season 497 have made a good growth.

Very truly, W. B. OTWELL.

HUNTINGTON, IND., July 10, 1897.

Dear Sirs:—

In the Spring of 1896, we planted 300 Pomona Currants, and to our surprise they fruited heavily this season. I had 1,900 Currants planted of White Grape, Cherry, Red Dutch, Victoria and L. B. Holland, that were planted in the Spring of '95; but Pomona planted last Spring yielded more than double the amount to the bush than any of the other varieties, picking over one quart to the bush. They were much sweeter and fewer seeds than any of the other varieties. Sorry that the entire plant are not Pomonas.

Yours sincerely, J. Z. LONG.

## A Few Testimonials from Shipments.

I received the plants you sent me this noon in perfect condition. They are certainly the strongest plants I ever received from any Eastern firm, and such fibrous roots, it did me good to look at them. If they do not make a fine growth it surely will not be your fault.

IRA W. ADAMS, California.

Your plants at hand. I have been buying all kinds of plants for the last fifteen years. I must say that yours were better than the best I have ever bought in fifteen years. I will order from you in the spring, as I think it would be too late now for fall planting.

J. TAVEMER, Iowa.

The 21,500 Gooseberry and Currants bought of you this spring are all doing finely; not over 200 lost in the entire lot.

E. S. HOLMES, N. J.

[P. S.—Mr. E. S. Holmes bought all 2 years No. 2 grade of Gooseberries and 2 years No. 3 grade of Currants. This goes to show what kind of stock my No. 2 grade and No. 3 grade is.]

The 3,100 Gregg and Palmer's Raspberry Plants you sent me this spring were the best plants I think I ever saw. I have sold a great many plants during the past twelve years. If you furnish plants like those mentioned above I will order what plants I need from you hereafter.

W. P. M. KUNKLE,  
(Dealer), Pa.

Received package from you by American Express. Thanks for your promptness. It is all O. K. and complete.

GEO. MONTILLON N. Y.

I was somewhat astonished when I received your letter stating that you had filled and sent my order the next day after receiving it. This is something very unusual for any nurserymen to do. And I wish to express my sincere thanks not only for this extreme promptness, but for the finely rooted plants which came this long journey in good condition.

ROBT. A. NEWTON, Oregon.

Some time ago I sent to you for some Currants and Gooseberries, and I find I will need some more. Those you sent were dandies, as fine as any I have ever received, and I have ordered more or less plants annually for many years.

S. A. PERDEN, KAN.

Your Pearl and Red Jacket Gooseberries you sent me were fine, and I shall not lose one plant, I think.

H. E. MOON, Ind.

Inclosed please find draft for Vines, Plants, etc. The Grape Vines and Gooseberry plants were splendid. Please accept thanks for prompt attention in filling my order. I will try hereafter to give you a portion of my trade.
